

To Whom it may concern –

We are against having 131 acres mined so that Tilcon can use it for crushed stone. We live right next to Crescent Lake, and this would ruin the environment and the animal population would be forced to move. Southington enjoys hiking on Crescent Lake, and this would potentially disturb trail walkers and other residents that live near by. Further, if enacted, forest land and wildlife habitat will be irrevocably destroyed. In its wake will be left a gaping hole in the earth. This is bad for us, and for our children. Our families and their future generations deserve better. Your proposal to obliterate yet more of their ever shrinking world is an injustice and a crime, not just against humanity, but against our increasingly fragile environment.

Please consider this carefully before making your decision.

Best Regards,

Anneliese Dadras, Owner
